**Subject:** B707 RCRA Closures

Sirs,

The purpose of this e-mail is to provide a record of notification of intent to begin closure of several RCRA units in B707. In particular GB's A-25, A-30, A-35, A-45, & A-55 in Mod A; the racks will be removed as TRU waste and the GB's eventually closed by the method of unit removal. All the GB's in Mod E will be closed by debris treatment; starting with GB E-60, E-65, E-70, and the section of S-7 chainveyor between E-60 and E-80. Additional sections of the mixed residue drain lines in Mod A, Mod C, Mod D, and Mod E that end up in C-pit will be removed in the near future.
